March 21-22, 2020

Introducing HackWCU 2.0

HackWCU 2.0 is West Chester University's **community-first hackathon**! We continue into our **second** year as the premier tech event for hackers and engineers in the **Greater Philadelphia Area**. In 2019, we welcomed 150 university and collegiate developers from across the state to create mobile, web, and hardware hacks within 24-hours. This year, we are excited to be hosting 250 of students for a full day of fun, innovation, and creative problem solving. **We give hackers an environment where creativity and learning alike can flourish.**

Why Sponsor?

Increase recruitment potential. Getting involved with HackWCU is the most effective recruiting effort you can make to engage with the tech industry's rising talent. Since our community is greatly comprised of the industry's topmost passionate developers, entrepreneurs, and engineers

we make it easy to find your future coworker.

Kickstart your API or product. Hackathons provide companies the opportunity to receive live feedback on their products from developers who use them. Excite hackers about your product by demonstrating why and how your tool helps them build their dream product.

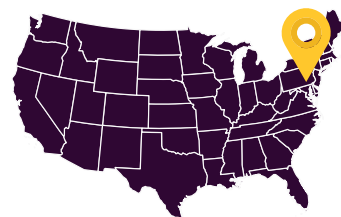

Gain brand awareness. As a critical member of the Greater Philadelphia Area hacker community, attendees trust the sponsors we invite; viewing them as an extension of the group. The more swag you bring and the more unique your company's presence, the more impactful your sponsorship will be on the collective. In the past companies have promoted their brand through t-shirts, stickers, water bottles and even game booths!
